1 Exemple de notebooks

Exemple très simple permettant de créer un dataframe.

```
[1]: import numpy  
     from pandas import DataFrame
```

```
[2]: df = DataFrame ( [ dict(x=1.0, y=1.0), dict(x=1.5, y=2)] )
```

```
[3]: df
```

```
[3]:      x  y  
0  1.0  1  
1  1.5  2
```

```
[4]:
```
